

## Stop Wasting Precious Money and Valuable Time Washing Your Machine Parts by Hand!

As a busy workshop owner, you can't afford to pay your technicians 'top dollar' to be washing and degreasing your parts, when you can have a state of the art **Hotwash Industrial Parts Degreasing Machine**. Automatically and **LABOUR FREE** completing the job in a 1/3 of the time, producing a cleaner result than any human possibly can.

Not to mention the **OH&S** liability you are putting yourself in exposing your staff to dangerous solvents on a daily basis, plus the 'back stress' ergonomics of lifting parts in and out of wash tubs.

**You are Literally Pouring Money Down the Drain with a Lawsuit waiting to Happen!**

Let's quickly crunch some numbers so you can see it for yourself:

- A technician washing parts for 1 hour a day at \$50 an hour = \$250 lost per week.
- That's 250 lost hours per year
- 250 billable hours multiplied by \$50 = **\$12,500 wasted cash going down the drain**

**\$12,500** wasted paying a qualified technician, or even a labourer, to be a parts washer. It just doesn't make sense does it?

If the same technician is using his skills to bring in \$100 an hour for every hour he works in your workshop, these extra 250 hours equates to an extra **\$25,000** cash for your business.

That's a \$37,500 turnaround for your business and it gets even better because... **You Can Charge Out the Hourly Rate to the Customer While the Machine Does the Work for You Automatically, Labour Free.**

## Are You Exposing Yourself and Your Workshop Staff to this Costly and Dangerous Practise?

**Are you Still Renting that Parts Washer you will Never Own? Is your Old Parts Washer Unreliable, or Worse Still, Unsafe?**

**Discover how to Save Time and Money while Dramatically Increasing PROFIT and SAFETY in your Workshop.**

## Introducing the Hotwash SS870 & SS1100 Industrial Degreasing Machines

**Hotwash Australia** is the leading manufacturer, retailer and installer of degreasing hot wash machines for the mining, engineering and automotive industries nationwide.

All our machines are aqueous based, automatic, efficient and environmentally friendly for your piece of mind. Based in Welshpool, Perth, Jim McDonald and his team are here to help you find the right washer for your workshop.

### SS870, the Perfect Hotwash Machine for the Busy Mechanical Workshop

The **Hotwash SS870** is small enough to fit in any workshop but tough enough to clean hardest of parts. With a basket diameter of 870 mm, internal height of 450mm and a loading capacity of 300kg, this machine will clean anything you can fit inside and save you countless hours and money.

#### Features

- Stainless steel AISI 304 body construction.
- 870mm basket diameter.
- 450mm internal height.
- 300kg loading capacity.
- 100 litre tank capacity.
- 7.5w heaters
- Turntable with driving motor included
- Oil separator included
- 141x104x114 footprint
- Castor wheels for easy manoeuvrability
- Total machine weight of 170kg.

sales@hotwash.com.au

## SS1100, a Little Bigger with Removable Basket and Trolley for Easy Loading

The **Hotwash SS1100** is capable of washing larger mechanical parts due to the 1100mm diameter basket. An increased loading capacity of 440kg and internal height of 610mm allows a larger volume to be washed in one cycle. Like the SS870, castor wheels make these washers portable and easy to manoeuvre.

#### Benefits

- Corrosion free, Stainless Steel AISI 304 body construction.
- Gear Drive Safety Turn Table.
- Easy Load.
- Removable Turn Table and Trolley.
- Fast heat up.
- Digital Temp Gauge.
- Oil Skimmer.
- Big Pump Cleaning Power.

### Get Even More Cleaning Productivity with these Optional Extras.

- ✓ Second turntable
- ✓ Second trolley
- ✓ Extra turntable
- ✓ Small parts basket
- ✓ Large parts basket
- ✓ 20kg tub of Hotwash separator wash powder

## The Hotwash Australia's 'Unrivalled Industry First' Satisfaction Guarantees

- ✓ **Thirty-day Money Back Guarantee** (Conditions apply): For risk free purchases and your piece of mind.
- ✓ **Our On-Time Guarantee:** In the unlikely event your parts washer is not ready at the time we promised we will pay you for the inconvenience.
- ✓ **Our On-Spec Guarantee:** If we fail to install the items as per the build agreement, whatever item has been missed we will provide and install FREE of charge!
- ✓ **Our Quality Guarantee:** In the unlikely event any of our machines fail and cause your parts washing line to stop, we will pay for the cost of a mechanical technician to repair the machine.
- ✓ **Plus, what has to be the most powerful guarantee in the industry...** If we fail to meet our promise to you, simply return your parts washer to us and we will rectify the issue for FREE. And in the highly unlikely event you are still not satisfied... we will pay for one of our competitors to fix it.

## The Hotwash Stainless Steel Industrial Degreasing Machines are the Profit Centre your Business has been Waiting for

The **SS870** and **SS1100** are the perfect portable industrial degreasing machines for any small to medium sized workshop.

These machines will wash your parts 4 times faster than any employee and do a much better and cleaner job. This efficiency allows your team to get the parts back to the customer in a shorter time frame, meaning you get paid sooner.

The environmentally friendly Hotwash range uses water-based technology to clean grease from your workshop parts made of steel, aluminium, cast iron, brass and plastics with ease. Plus, don't forget...

### Hotwash Australia's No-Brainer 30-Day Money Back Guarantee

#### Removes All Your Risk! Here's How it Works.

If you are dissatisfied with the performance of the machine within 30 days of purchase, we will offer to buy back the machine for the price you paid, less the cost of any consumables used. \*Conditions apply

## Typical Comments from Satisfied Customers

"We have had our **Hotwash** for years now. We give it a pounding every day. We wash everything we can get our hands on. It saves us so much time and never lets us down. We could use 2 of them."

**Tony Debono, Proprietor, HiTech Cylinder Head**

"The washer purchased from back in 2013 has been brilliant. It has saved us so much time and money, not to mention downtime. We can now go ahead and order the parts we need while the **Hotwash** is doing its job. I could not believe how well the dirty parts came out. Most of the parts are submersible sewer pumps and they come out like new. Thanks for a great machine. We look forward to ordering our second one."

**Neil Paton, Team Leader Mechanical Services, Wannan Water**

"We love the **Hotwash**. It cleans beautifully, we are very happy, and we think it's a ripper! We should have bought years ago. Thanks, **Hotwash**."

**John Milan, Prototipi Racing WA**

"We own a **Hotwash** and my boys use it every day and the cleaning results are amazing. Time saved is unbelievable and the quality of cleaning is second to none and the machine has performed perfectly over the last couple of years with only a couple of minor issues which were sorted by Jim in flash. Our major savings are no more kero and degreaser going through the oil separator and on to the settling pits, only clean tested water goes out for dust suppression. This machine has been a winner since the very first day and I would highly recommend one of these to anyone"

**Paul Hutton, Supervisor, Guerionni and Son, Karratha**
